WHAT IS LEAF•COAT™?

Leaf•Coat™ is a ready-to-use product that strengthens and protects plants against unwanted insects and damaging leaf fungi. Made from natural latex that was originally developed to prevent evaporation, it creates a permeable, self-degradable barrier on the leaf, which still allows air and light to get through.

Why Leaf•Coat™ offers better protection in all conditions

If the atmosphere gets too hot and humid (over 28°C), Leaf•Coat™ helps prevent the plant from losing too much water through evaporation. At the same time, the natural latex layer it forms around the leaves, helps the

STRENGTHENER

plant breath and stops it from 'sweating'. Then when the temperature drops, such as in winter months, Leaf•Coat™ safeguards against the cold by helping maintain the leaf temperature.

As an environmentally friendly alternative to pesticides, Leaf•Coat™ couldn't be more suitable or safer to use. Reducing the need to use pesticides also saves money. And unlike synthetic and toxic products it has a pleasant smell, and doesn't irritate. Because Leaf•Coat™ doesn't get absorbed by the leaves, it doesn't affect the taste of the fruit either.

BOTTLES

250ML, 500ML, 1L, 5L, 10L, 20L

SETTING	PHASE	FUNCTION
 INDOOR	 GROWING	 PREVENTING
 OUTDOOR	 BLOOMING	

HOW TO USE IT

There's no need to mix Leaf•Coat™ with water – simply apply straight from the bottle, preferably from an atomiser. Spray the leaves and flowers completely, and repeat this about two times a week until a fortnight before the end of the flowering period. Within a few hours of application, a very thin elastic layer – 1.5 microns thick – forms on the leaves. Its beneficial effects last for up to two weeks until it is naturally decomposed by light or sunlight.
